

GEOCHRONICLE BASED IDENTIFICATION FOR E-BUSINESS

ABSTRACT OF THE INVENTION

A method and system for generating and processing object identifiers in an e-commerce environment. The system comprises a database for holding objects; at least one identification system for providing unique identifiers for objects, wherein the identification system obtains location and time information from a global positioning system (GPS) and encodes the location and time information into each unique identifier; and an application for processing the objects, wherein the application includes a system for processing the unique identifier.
